AI Agent Intern | LLM Developer | Machine Learning Researcher

[LinkedIn](#), [Github](#), [Portfolio](#)

SKILLS

AI/ML	Machine Learning, Deep Learning, Natural Language Processing, Large Language Model
Web & Database	NodeJS, ExpressJS, ReactJS, Flask, Tailwindcss, MySQL, MongoDB

EDUCATION

San Francisco State University	San Francisco, California
<i>Bachelor's in Computer Science</i>	
<ul style="list-style-type: none">GPA: 3.97/4.00, Dean's List	Expected Graduation May 2027

EXPERIENCE

Dreamable Inc.	San Francisco, California
<i>AI Agent Intern</i>	<i>June 2025 – Present</i>

- Collaborating on the development of AI agent solutions that enable developers to build intelligent LLM workflows 2 to 3 times faster using low-code and no-code tools
- Focusing on agent orchestration, prompt chaining, and modular tool integration to simplify complex AI behavior into developer-friendly components.

Dyna Grow Design Solution	Ahmedabad, India
<i>Web Developer Intern</i>	<i>May 2024 – Dec 2024</i>

- Developed a responsive website using Node.js, Express.js, and EJS for an architecture firm in Ahmedabad.
- Streamlining their marketing efforts and enabling them to attract more clients.
- Received a Letter of Recommendation from Maitra Shah for exemplary performance during the internship.

PROJECTS

Custom LLM - KsM ([github](#))

- Built a custom 215M-parameter GPT-style language model with 18 transformer blocks and a 512-token context window, trained on 5 novels using a self-implemented tokenizer, attention mechanism, and training loop, achieving over 85% accuracy on internal benchmarks.

theHelper - AI Research Assistant ([github](#))

- Engineered a PDF analysis tool using PyPDF2, BERT/BART transformers, and FAISS for semantic search, packaged in a Streamlit app for real-time summarization and Q&A — reducing manual review time by 70% across 50+ academic and business documents.

Max – Advanced Voice-Activated Assistant ([github](#))

- Created a fully voice-controlled AI assistant integrating LangChain, OpenAI, Hugging Face, and SpeechRecognition for tasks like web search, email, scheduling, maps, and YouTube — achieving 90% voice command accuracy in real-world usage.

IdeaCheck – AI-Powered Startup Evaluator ([github](#))

- Built an AI-powered web application using GPT-4o-mini and LangChain to evaluate startup ideas with tailored validation and feedback, used by 20+ early-stage founders for decision-making support
